

"A Lady with a Lamp shall stand
In the great history of the land."
SANTA FILOMENA by Longfellow
in memory of Florence Nightingale

Nightingale

THE ONLY COMPLETE HOSPITAL "FLOOR LAMP"
THAT DOES NOT OCCUPY VALUABLE FLOOR SPACE

Nothing TO TIP OVER
Nothing TO CLEAN UNDER
Nothing IN THE WAY

Performs **MORE** Functions **BETTER** • has **MORE** Outstanding
features than most hospital lamps costing twice as much.

Compare These Features!

- Flexible, glare-free reading light.
- Completely separate night light unit . . . below mattress level.
- Soothing indirect illumination.
- Unequalled examining light . . . at any point . . . Maintains position . . . does not have to be held.
- Convenient plug-in receptacle on night light unit.
- Universal base joint . . . finger-tip adjustment in every direction.

ADJUSTABLE FIXTURE COMPANY

Established 1911

104 EAST MASON STREET • MILWAUKEE 2, WISCONSIN

"A Lady with a Lamp shall stand
In the great history of the land."

Nightingale

Flexible Reading Light for Bedside Use

Universal base joint permits use of lamp several feet from bed. May be swiveled to a completely horizontal position if desired.

Never Disturbs Patient

Note how patient is completely shielded as visitor reads to her. Lamp is easily adjusted to shield every patient in room.

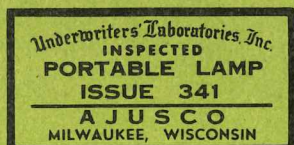

Convenience Outlet

Patient's Radio is plugged into handy and accessible outlet on night light unit.

For the Protection of Every Hospital

The NIGHTINGALE is approved by and listed with the Underwriters' Laboratories, Inc.

ALWAYS LOOK FOR THIS LABEL.

This label means that the NIGHTINGALE has been thoroughly examined and tested by this expertly trained group of engineers, and that it complies fully with their rigid safety requirements.

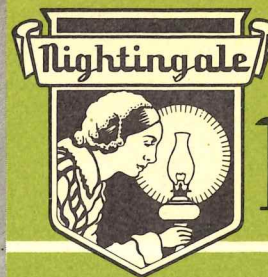

DESIGNED IN A HOSPITAL WITH THE HELP OF PATIENTS, NURSES, DOCTORS AND ENGINEERS

Here at last, is the lamp the hospital has been wanting! It is designed by the people who work with hospital lamps . . . the people who use them, install them, repair them. These are the people who know the features and qualities a hospital lamp should possess.

The NIGHTINGALE is the result of the co-operative efforts of all of these people. It is an economical lamp designed to do more for less.

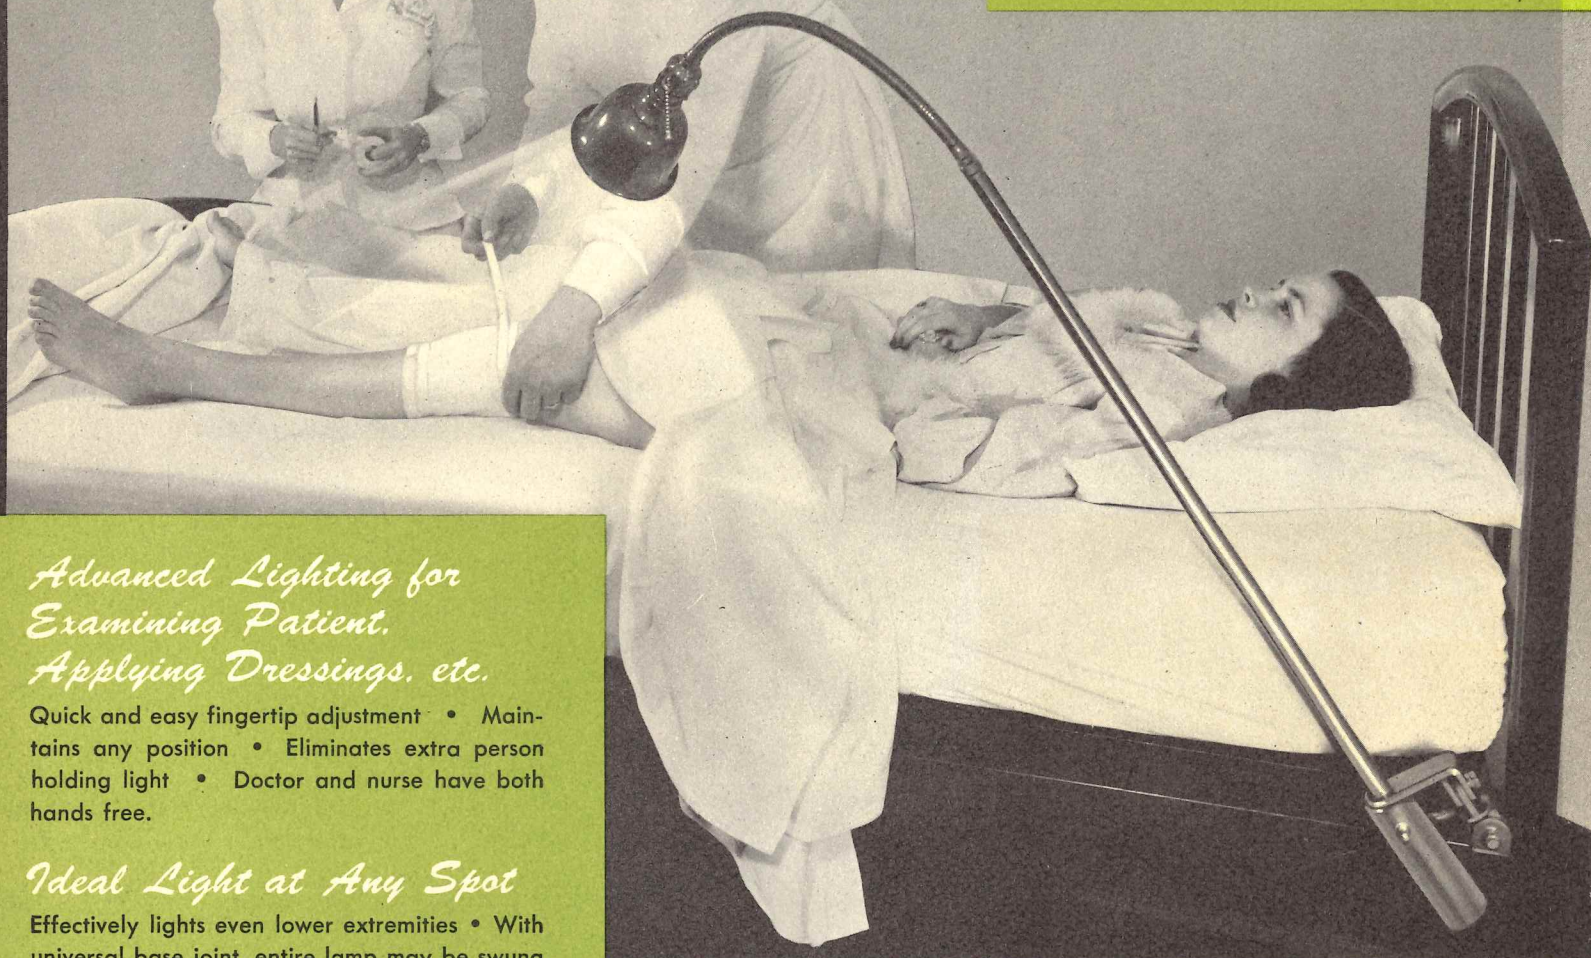

Its many outstanding features are readily apparent. Its quality is of the highest. It is built to take years of rough treatment . . . yet designed for quick, easy repairs.

The NIGHTINGALE is universally adaptable, yet ideally suited to each individual patient, nurse and doctor.

"A Lady with a Lamp shall stand
In the great history of the land."

Nightingale

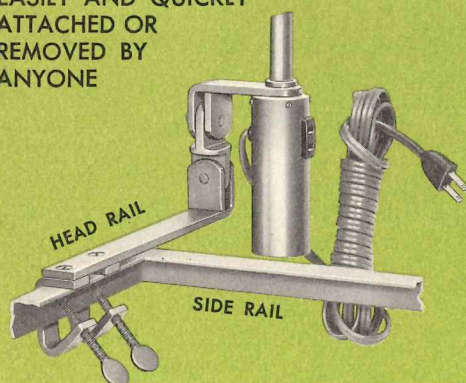

Advanced Lighting for Examining Patient. Applying Dressings, etc.

Quick and easy fingertip adjustment • Maintains any position • Eliminates extra person holding light • Doctor and nurse have both hands free.

Ideal Light at Any Spot

Effectively lights even lower extremities • With universal base joint, entire lamp may be swung completely over patient and as far towards foot of bed as desired • Exact angle of reflector is always assured with the 15" flexible arm.

**NO TOOLS REQUIRED
EASILY AND QUICKLY
ATTACHED OR
REMOVED BY
ANYONE**

Perfectly Safe!

Two thumb screws insure a secure fit • Clamp is so designed that lamp cannot fall on patient even if loosely attached to bed.

FITS ANY STANDARD HOSPITAL BED

Fastens to the angle iron rail across the head of the bed.

Mounts near left side of bed with lamp itself slightly beyond the edge of the bed. Night light and plug-in receptacle are then conveniently located below mattress level at side of bed . . . The universal joint at base is then free to function — neither the mattress nor the bed-rail will interfere with the adjustment of the lamp.

UNIVERSALLY ADJUSTABLE

Lamp rides with moveable spring as patient is raised or lowered — always convenient and accessible.

Universal joint at base permits lamp to be moved in any direction. It may be swung over the bed or away from the bed . . . toward the foot of the bed or toward the head. Its hor-

izontal reach of over 4 feet, makes it ideal for examinations, application of dressings, etc.

Countless adjustments are possible with the 15 inch flexible arm. The reflector will *always* be at exactly the right spot and the right angle . . . will never glare in the eyes of any patient.

"A Lady with a lamp shall stand
In the great history of the land."

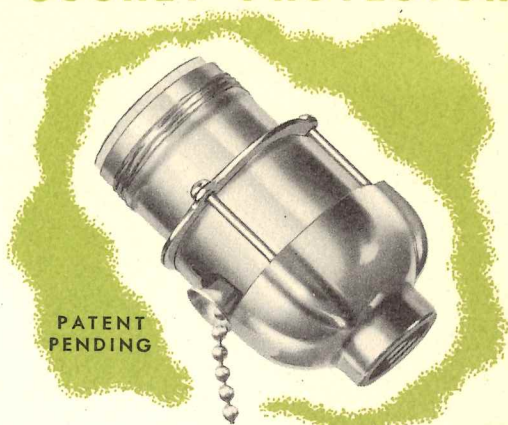

Nightingale

Convenient Night Light

Completely separate unit.
Subdued light below mattress level —
disturbs none of the patients.
Comforting to uneasy patients.
Handy for patient to get up at night
without disturbing other patients.
Convenient for night nurse.
Note indirect lighting position of upper
arm and large reflector. Completely out
of way.
